Our Industrial Hygiene Program boasts an extensive feature set and unprecedented ease of use, making it the most capable IH database ever offered.

Call today to find out for yourself and you will agree that Open Range Software is "Simply the Best IH Software available."

Industrial Hygiene Software

Industrial Hygiene Selected Highlights

Industrial Hygiene Sampling

- Record personal and area monitoring results
- Sample types include air, noise, biological, bulk, wipe, heat stress, light, water and more
- Result types include 8, 10, and 12 hour TWA's, ceilings, STELs, excursions, noise dosimetry & more
- Schedule sampling activities and responsibilities

Employee Notification Reports

- Easily generate and distribute employee notification letters via print or Email
- Track employee notification status to ensure workers are properly notified and provide documentation

Automated Calculations

- Automatically calculate sample and TWA concentrations, volumes, and sample times
- Combine multiple samples for a single TWA result
- Standard unit conversions are handled automatically

Integrate with Existing Programs

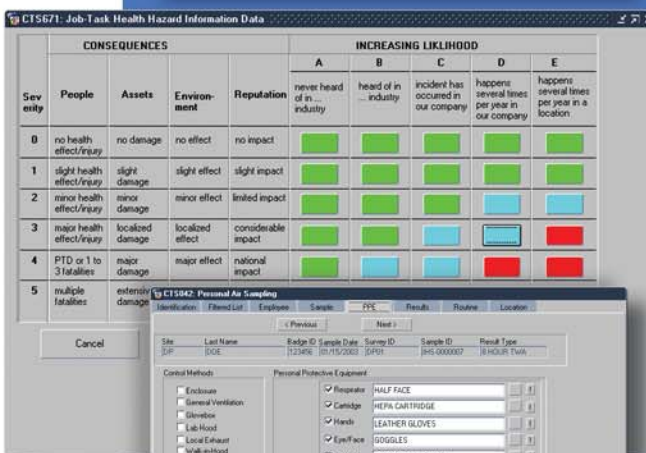

- Import legacy sampling data
- Export data to Microsoft Excel for statistical analysis
- Integrate with ERP programs (including SAP and PeopleSoft)
- Generate Adobe Acrobat PDF reports to easily Email and distribute information

Web-Based Delivery

- Securely access your data and reports from any computer simply by using your web browser
- Server-based software allows fast, centralized updating

Exposure Groups

- Prioritize workplace risks to focus your budget and resources where they can be most effective
- Demonstrate compliance with PPE standards by documenting the personal protective equipment worn and used by workers

Simply
the Best
IH software
available.
